

**Dr. Jim Rippon**  
**President**  
**AMEC NCL**

Dr. Jim Rippon, President of AMEC NCL, has over 32 years experience in the nuclear industry. Prior to coming to Canada in 2001, Dr. Rippon managed the extensive programme of transient analysis for the Sizewell `B` Station Safety Report. His areas of responsibilities have included code development, verification and validation, PWR, AGR and Fast Reactor transient fault studies, PRA, plant performance and maintenance of customer and licensing interfaces. He has been the independent member on the British Energy's Nuclear Safety Operational Review

Committee for Sizewell `B`.

Since moving to Canada in 2001 and prior to his current role as President of AMEC NCL, he project managed the Bruce A Restart Safety Analysis work carried out by an NNC/AECL Consortium, was COO of Nuclear Safety Solutions and General Manager of AMEC NCL - the Project Management Contractor for Bruce Power Units 1 & 2 Refurbishment Project.
