

Nuclear Canada Yearbook 2005

Suppliers' Addresses & Representatives

Babcock & Wilcox Canada Nuclear Services

- Customer-focused, full scope nuclear services including:
 - Steam generators and heat exchangers, inspection, maintenance and repair
 - Replacement parts
 - Engineered products
- Highly skilled, qualified Canadian-based capability
- Unmatched OEM knowledge and expertise in steam generators, heat exchangers, pressurizers, feeders, and other components
- Extensive training support including simulations and mock-ups
- A fully accredited Pressure Boundary Q.A. Program: N, NA, NPT
- Balance of plant capabilities, including valves and electrical components
- Industry-leading technologies
- Engineering services based on extensive OEM experience
- Practical, innovative solutions
- Experience in every CANDU 6 plant around the world

Serving Canadian nuclear plants with engineering, manufacturing, and service solutions since the beginning of nuclear power generation in Canada.

The information contained herein is provided for general information purposes only, and is not intended or to be construed as a warranty, an offer, or any representation of contractual or other legal responsibility.

your business is **power**

our power is **people**

 high performance business needs high performance people

Our recruiting staff are experts at sourcing people with power utility skills. The Ian Martin reputation attracts the best engineering and technical talent available and we bring it to our clients. Some of the areas we have supplied people to are:

- Design Engineering
- Environmental Qualification
- Rotating Equipment Engineers
- Field Work and Walk Downs
- Fire Protection
- Information Systems
- Instrumentation Control
- NDT Personnel
- Radiation Control
- Outage Personnel
- Piping
- PDS - Plant Design
- Planning/Scheduling
- Procedure Writers/Documentation
- Procurement
- Project Management
- Stationary Engineers

Ian Martin can provide the talented people and innovative solutions that you need to meet the challenge of a demanding and increasingly competitive industry. At Ian Martin, our Power is People.

Nuclear Safety Solutions

We're on the way to being a mighty oak!

Formerly a part of the Ontario public sector, NSS has

- Grown the number of customers from 3 to 36
- Increased our full-time staff by 30%

Building on 30 years of nuclear safety expertise, we have

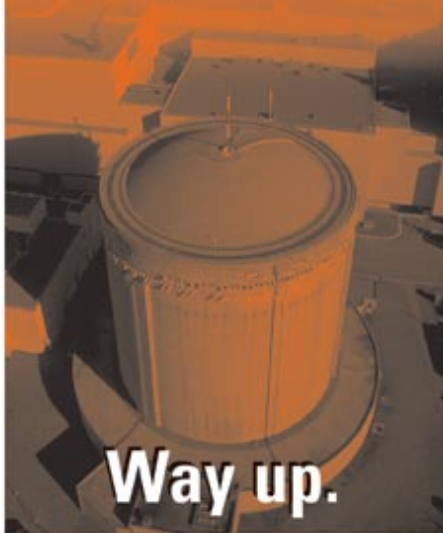

- Branched out into new areas including: risk-based asset management; environmental assessment for dismantling Russian submarines; turbine generator technical services; health physics; piping programs for fossil plants; seismic analysis; conventional engineering services; severe accident management services . . .

Visit www.nuclearsafetysolutions.com or call Walter Thompson at 416-592-4349. NSS is a wholly owned subsidiary of NNC Holdings Limited, an independent, multi-disciplinary international consultancy organization with 1,300 professional engineers, scientists and managers, providing consultancy services in the UK, North America, Asia, South Africa and Europe. NSS is the former Nuclear Safety Analysis Division of Ontario Power Generation (OPG). NSS develops practical and cost effective solutions to clients' problems by drawing on the knowledge and expertise of our experienced resources.

◆ Nuclear Safety Analysis & Assessment ◆ Reactor & Radiation Physics ◆ Thermal Hydraulics
◆ Structural Integrity ◆ Risk Management ◆ Engineering Technology

In order to grow and better serve
our clients, we had to look up.

Way up.

NUCLEAR POWER

Benefits Ontario

Over the past 30 years, nuclear energy has generated safe and reliable electricity for Ontario. At Ontario Power Generation, our nuclear stations provide about 40 per cent of OPG's electricity production, virtually free of the emissions that lead to smog and global warming.

Nuclear energy: clean air

Nuclear energy, along with other green energy options, will play an important role in meeting the world's increasing electricity needs.

Clean air and climate change are important issues for all of us.

CANDU® nuclear power plants do not produce gases that contribute

to global warming nor do they pollute the air we breathe. Use of nuclear energy in Canada has avoided putting a billion tonnes of greenhouse gases into the earth's atmosphere.

Nuclear energy, for a cleaner world
