

Mark P. Mills
Chief Technology Officer and Chairman
ICx Technologies

Mark P. Mills is a co-founder, Chief Technology Officer, and Chairman of the Board of ICx Technologies. He is also a co-founding partner in the venture fund Digital Power Capital, and founding member of the Digital Power Group, a research firm.

He has been published in various popular publications, including Forbes, Wall Street Journal and the New York Times Magazine, as well as numerous professional publications, and co-authored a book: *The Bottomless Well: The Twilight of Fuel, the Virtue of Waste, and Why We Will Never Run Out of Energy* (Basic Books, January 2005, paperback 2006). He has also testified before and briefed many state public service commissions, legislative groups, state legislators, and the U.S. Congress.

Before founding Digital Power Capital with his colleagues, Mark founded and ran a technology consulting business for 17 years. He served as a staff consultant to The White House Science Office (under President Reagan), a number of the Federal Research Laboratories, the (former) Congressional Office of Technology Assessment, and the U.S. Department of Energy. Mark was an experimental physicist and development engineer in the fields of integrated circuits during the early 1970s, the “Jurassic era” of microprocessors. He also worked in fiber optics, defense and solid-state devices, fields in which he holds several patents. Mark holds a degree in physics from Queen’s University, Canada, and is a member of numerous professional societies including the American Physical Society and Institute of Electric and Electronic Engineers.
