

### **Ken Seitz**

Mr Seitz is Vice-President of Corporate Development and Power Generation in Cameco Corporation. He started with Cameco in 1995 contributing as a design engineer on both the McArthur River and Cigar Lake Projects. In 1999, through an arrangement with Cameco, he also worked with a regional power producer on a climate change and emissions trading initiative in Ukraine. In 2000 Ken took a position in the oil and gas industry with PanCanadian Energy, working primarily in strategic planning and corporate development. In 2002 he participated in the largest Canadian industrial merger to date when PanCanadian Energy merged with another Canadian oil and gas company to form EnCana Corporation. Ken continued with EnCana in a corporate development role until 2004. Ken rejoined Cameco in 2004 as a member of the corporate development group working primarily on the nuclear fuel cycle.

Ken Seitz is a Professional Engineer registered in Canada, and also has a Bachelor's Degree in Economics, a Master of Business Administration and a Certificate in Management, Stern School of Business.
