

Robert Reinstein

Bob Reinstein is President of Reinstein & Associates International, Inc., founded in 1996; it is a consulting firm, which specializes in energy, environment and international trade. Mr. Reinstein has had a varied series of careers during more than four decades of professional experience as a scientist, economist, negotiator and diplomat.

Mr. Reinstein served as Executive Vice President of the Washington International Energy Group, a consulting firm, from 1993 until 1996. Prior to that Mr Reinstein served with the US Department of State as the Deputy Assistant Secretary for Environment, Health and Natural Resources as the chief US negotiator for the UN convention on climate change and for the Montreal Protocol to protect the ozone layer. He was also chairman of Working Group III (on response strategies, 1991-92) and of Working Group II (on impacts, adaptation and mitigation, 1992-93) of the UN Intergovernmental Panel on Climate Change (IPCC).

From 1982 to 1990 Mr. Reinstein was a trade negotiator at the White House Office of the US Trade Representative (USTR), responsible for coordinating US trade policy for energy, chemicals, natural resources and environment. From 1975 to 1982 he was with the Federal Energy Administration and the Department of Energy, where he was chief economist of the Department's Economic Regulatory Administration from 1978 to 1981. He was a teacher, writer and editor from 1961 to 1975, specializing in several sciences, economics and computer science, including serving as Senior Science Editor at Columbia University Press from 1972 to 1974.
